Teeth

Binoculars

Non-Retractable Claws

Slinky

Flexible Spine

Sun Glasses

Tail

Cleats

**Instructions:** Fill in the blank with the correct answer from the word bank.

Long	Small
Short	Big

The cheetah is the fastest land animal! They can run up to 70 miles per hour and can cover up to 25 feet in one stride with their \_\_\_\_\_ legs. The heart pumps blood throughout the cheetah's body. The blood carries oxygen from the lungs to the muscles to keep them strong. A \_\_\_\_\_ heart helps to pump more blood to the muscles, giving the cheetah more energy.
